Project Planning – Logic Model

Inputs	Activities	Outputs	Outcomes	Impacts
What is going into the program (such as resources). (e.g. staff, equipment, other resources)	*What the program is doing, what services are being delivered and the strategies to deliver those services.*	*Immediate results that are part of the program process. (e.g. use of risk/needs assessment, drugs screens, participants served)*	*Shorter-term goals or results. (e.g. in program recidivism, graduation rates)*	*Longer-term "big picture" goals or results. (e.g. reductions in recidivism, jail/prison bed days saved)*

Contextual Conditions	*External factors that can impact the project and the ability to meet the intended outcome and impact (e.g. community, political, financial, etc.)*
